Networking Security Programs Near Detroit, MI: What Are the Top Schools?

Because there is a critical shortage of qualified computer security professionals, graduates of a Networking Security program will have a good chance of finding employment upon receiving their degrees. Students near Detroit, MI, could earn a Networking Security degree at several universities and colleges in the area. The top schools are Macomb Community College in Warren, Henry Ford Community College in Dearborn and Washtenaw Community College in Ann Arbor.

Macomb Community College

Macomb Community College in Warren, MI, opened its doors to students in 1954 and has been a prominent educational facility ever since. The Network Security Professional certificate option focuses entirely on information assurance issues. Courses a student might attend include information threats assessment, web security and cryptography. Macomb Community College has the following options:

- Network Security Professional Certificate

- Information Assurance Certificate
- Associate of Applied Science in Networking Specialist

Address: 14500 E Twelve Mile Rd, Warren, Michigan 48088-3896

Henry Ford Community College

The Henry Ford Community College in Dearborn, MI, is a member of the International Cyber-Security Education Consortium and offers a Networking Security degree program. The courses emphasize technical security, strategic security plans, legal and regulatory compliance and ethical conduct. Graduates can choose either to find immediate employment after graduation or to transfer their credits to a four-year university and pursue a bachelor's degree in this field. Henry Ford Community College has the following degree options:

- Associate of Applied Science in Information Assurance
- Associate of Applied Science in Network Administration

Address: 5101 Evergreen Rd, Dearborn, Michigan 48128-1495

Washtenaw Community College

Washtenaw Community College in Ann Arbor, MI, has a Networking Security program designed to prepare students to become skilled computer systems security professionals. Graduates often find entry-level positions as network security administrators, systems security administrators or data security analysts. Courses focus on security technologies, network security planning and data confidentiality. WCC offers the following degree options to students:

- Associate of Applied Science in Computer Systems Security
- Information Assurance Certificate
- Network Security Advanced Certificate

Address: 4800 E Huron River Dr, Ann Arbor, Michigan 48106-1610
